20	New York Jets	NYJ	4

Validation requirements

- TE ranks must be continuous from 1 through 30.
- K and DEF ranks must each be continuous from 1 through 20.
- Player/defense names, IDs, and slugs must be unique within the Iron City canonical dataset.
- Existing permanent IDs must be preserved; new IDs must never be derived from a mutable ranking position.
- Wix URLs remain pending until the public card-page architecture is approved and built.
- No Wix pages should be created or modified during this data-validation step.

Next step

Validate the complete Iron City player pool across QB, RB, WR, TE, K, and DEF before beginning permanent URL planning.
